

THE BITE

Did You Know!?

THE AAO RECOMMENDS CHILDREN FIRST SEE AN ORTHODONTIST AT AGE 7!

SAY HELLO TO OUR LITTLE FRIEND, BUCKEE!

He's soft, cuddle, and can't wait to meet you. In fact, he's up for adoption! Stop by one of our locations & ask how you can partner with us to benefit "Backpacks of Love" & take Buckee home!

WHY!?

01

Early Detection of Issues:

By age 7, children have a mix of baby and permanent teeth, making it easier for orthodontists to identify potential problems like misaligned bites, crooked teeth, or crowding.

02

Proactive Intervention:

Early detection allows for timely intervention, potentially preventing more extensive and costly treatments later on.

03

Addressing Bad Habits:

Orthodontists can also address habits like thumb-sucking or tongue thrusting that can affect tooth alignment.

04

Monitoring Jaw Development

At this age, orthodontists can assess jaw development and predict how the bite will fit together.

05

Other Signs To Consider:

Orthodontists can detect oral habits that persist into early elementary school, crooked teeth, crowding or spacing between teeth, and underbites or overbites.

SPECIAL OFFER

Mention this newsletter during your **FREE** consultation this month & take advantage of:

\$400 down + \$189 per month
